
Division : Rolling mill

Location : Gasifire

Date : 20-12-2014

Time : 11:30am.

Scenario Considered for Emergency Declaration :-

Presuming that there was a CO gas leakage due improper seating between two pipe flanges, two operators tried to stop the leakage. During this time they inhaled the CO gas and due to this two operator's got affected & became semiconscious.

One of the near by worker observed this incident and informed to the shift in-charge. Immediately message was conveyed to Incident controller & the Emergency controller, to evacuate the affected workmen & also to control the gas leakage, emergency was declared.

All teams i.e. Rescue Team, Repair Team, Fire Fighting Team, First Aid/Ambulance Team & Security Team were summoned to the site and all teams acted to control the emergency.
